New Microsoft Intune Suite Bundle

Microsoft has launched the **Microsoft Intune Suite**, which unifies mission-critical advanced endpoint management and security solutions into one simple bundle. The new Intune Suite can simplify our customers' endpoint management experience, improve their security posture, and keep people at the center with exceptional user experiences. Microsoft Security and Microsoft 365 deeply integrated with the Intune Suite will empower IT and security teams with data science and AI to increase automation, helping them move simply and quickly from reactive to proactive in addressing endpoint management and other security challenges.

Features includes:
- Remote Help
- Endpoint Privilege Management
- Advanced Endpoint Analytics
- Management of Specialty Devices

What are the benefits for partners and customers?
- Improve security and reduce attack vectors.
- Simplify endpoint management.
- Enable cost savings.

Microsoft Intune Suite is now available in CSP from TD SYNNEX StreamOne portals.
